

NETWORK ADMINISTRATOR (Montreal)

At Axiom, the Network Administrator is responsible for maintaining the networks and systems that keep our organization running. From maintaining ironclad security to supervising network updates and training users, the Administrator is not only IT support but also one of the threads that connects all operations. Deep technological expertise with a wide range of computer systems, hardware, and software is essential for the Network Administrator to excel in this role and help drive our organization forward.

KEY RESPONSIBILITIES

- Assist in network design, implementation, and maintenance;
- Provide network and general IT support across organizational operating systems;
- Maintain stable and consistent connectivity across all network computers;
- Prepare, implement, and monitor disaster procedures and recovery;
- Identify, track, document and analyze incident or problem resolution activities;
- Maintain network servers and associated hardware, software, services, and settings;
- Recommend, test, and implement system and security upgrades;
- Consistently monitor and troubleshoot network stability and performance;
- Create, adjust, and maintain network user settings and permissions;
- Provide IT training to employees;
- Write technical support documentation for network systems and applications;
- Participate in training to keep up to date on current and emerging technologies.

PROFESSIONAL REQUIREMENTS

- Bachelor's degree (or equivalent) in computer science or related field;
- 3 to 5 years of experience in a Network Administration role;
- Professional certification, such as CISSP, CCNA, or CCNP, a strong asset.

KNOWLEDGE & SKILLS

- Strong analytical and problem-solving ability;
- Strong change management ability, excellent time and priority management;
- Focus on customer service and teamwork;
- Initiative, resourcefulness, rigor and discretion;
- Strong communication skills for training and assisting users;
- Experience in a multi-site company;
- Oral and written bilingualism (French and English);
- Comprehensive knowledge of networking concepts and computing infrastructures;
- Proven skills in network engineering, operations, and performance analysis;
- Experience with leading server management and monitoring tools;
- Experience with Microsoft Windows Server 2008 and forward;
- Experience with Cisco switches and routers;
- Knowledge and/or experience with network segmentation, network security practices and implementations.

Practical experience in the use of the following technologies will be considered a considerable asset:

- Windows Environment; Active Director / Azure AD and Windows permissions management; Microsoft Cloud; Office 365, Teams; Sharepoint; Windows Server; SQL Server; Terminal Server; Hyper-V virtualization; VMware; Windows event logs and others; Network hardware (hubs, switches, routers, etc.) and network management tools; Sage 300c (Accpac).

Founded in 2009, Axiom Infrastructure is an independent employee-owned fund manager dedicated to investing in the infrastructure sector. With over 100 employees, the firm benefits from the extensive infrastructure backgrounds of its team of professionals who have gained, over their career, significant experience acquiring, developing, financing, operating, and managing infrastructure assets. Axiom's investment strategy focuses on core infrastructure assets with an active approach to operations and asset management and integration of strong environmental, social and governance ('ESG') principles. Over the years, the firm has built a diversified portfolio of over 260 assets and today has over C\$10 billion of assets under management.

Axiom Infrastructure offers a dynamic, respectful, and collaborative work environment in its offices located in the core of the financial districts of Montreal, Toronto, Vancouver, New York and London. The firm also strongly believes in upholding ESG principles and is focused on providing employees a sustainability-oriented workplace. A full benefit package is offered to permanent employees: insurance, pension plan, flexible hours, remote work (2 days a week), reimbursement of monthly public transportation passes, physical activity program and much more!
